

Reduce
Costly Incidents

LED-Illuminated Garage Door Safety Kits

**Prevent
Costly
Garage Door
Strikes**

Action Industries' advanced LED-Illuminated Garage Door Safety Kits attach brightly colored LED light strips to the driver's side of commercial door frames. The LEDs are connected to a patent-pending LED controller that integrates with most photo-eyes or laser curtains. This highly cost-effective safety enhancement can reduce commercial door incidents and save you thousands of dollars in repair costs.

Action's easy-to-install LED-Illuminated Garage Door Safety Kits feature bright LED strips that intelligently change colors and are user-configurable:

- ✓ ***Red when door is closed***
- ✓ ***Flash red when in motion or loses power***
- ✓ ***Solid green when fully open***
- ✓ ***Flash white if safety eye fails***
- ✓ ***Can display any color***

**Solid
Red LED
Door Closed**

**Flashing

LED-Illuminated Garage Door Safety Kits

LEDs are IP-68 Rated, Waterproof, UV Protected and Daylight Visible:

- Available in 5', 10', 15' and 20' strips — single or double sided
- Preserve night vision — bright red LEDs bask entire truck bays in red light reducing the need for white light
- Compatible with most commercial garage doors

Product Options:

- Available in double-sided kits for back-in stations (inside and outside)
- Aluminum track — available in four different styles for sectional vs rolling steel doors
- Hallway lighting kits also available to put red lighting throughout a fire station (trigger on dispatch)
- LED can be epoxyed into floor for a bold truck-backing guide

Mission Critical Door Safety Add-Ons

Patent-pending LED controller integrates with most commercial door operators and safety sensors including LZR-i30

- Provides power supply to the safety sensor
- LEDs flash if CDO power loss is detected or if an alert is received
- LZR-i30 scans complete doorways up to 30' X 30'
